

Athul Krishna U

QA / Software Tester

Kochi, Kerala | +91 6238824380 | athul1886@gmail.com | [LinkedIn](#)

PROFILE SUMMARY

QA Test Engineer with hands-on experience in manual testing, test case design, and automation testing using Selenium, Java, TestNG, Playwright, and Maestro (mobile automation with YAML and JavaScript). QA experience across 7+ web and mobile projects spanning e-commerce, healthcare, religious services, and service-booking platforms, including sole ownership of 400+ logged defect tickets on a single project. Skilled in functional, regression, UI, and cross-browser testing, defect tracking using Zoho and Jira, and API testing with Postman/Swagger. Experienced in building automation frameworks using the Page Object Model (POM) with integrated report generation and email trigger notifications. Collaborates closely with cross-functional development teams in Agile Scrum environments to deliver stable, high-quality releases.

PROFESSIONAL EXPERIENCE

QA Engineer | Doctcod Innovation Pvt. Ltd

Sep 2025 – Present

- Design and execute detailed manual test cases across 6+ live web and mobile projects, covering functional, UI, and regression testing.
- Perform end-to-end regression testing cycles to ensure product stability and release readiness prior to production deployment.
- Identify, document, and track defects using Zoho, defining clear reproduction steps, severity, and priority to accelerate developer resolution time.
- Collaborate closely with developers and product teams in Agile Scrum ceremonies to validate fixes and maintain high-quality release standards.
- Extend testing coverage to additional modules outside primary assignment when covering for teammates on leave, ensuring continuous QA coverage.
- Contribute to test case reviews and sprint planning discussions, providing QA input during requirement analysis to reduce defects introduced early in the SDLC.

Software Tester | Luminar Technolab

Aug 2024 – Feb 2025

- Executed test cases and performed defect reporting, classifying severity and priority levels for 100+ identified issues.
- Gained hands-on training in automation testing fundamentals using Selenium WebDriver and Java, building foundational skills in scripting automated test cases.
- Practiced automation script execution using TestNG and Maven under trainer guidance, reinforcing understanding of test framework structure.
- Authored comprehensive test plans and test cases aligned with product requirements and industry QA standards.
- Confirmed that all testing procedures complied with company and industry quality standards throughout the SDLC.
- Prepared detailed test summary reports for management, communicating test coverage, defect trends, and release readiness.

PROJECTS

Xpanz — E-Commerce Application

- Evaluated across 3 modules — user, admin, and vendor workflows — covering product, order, cart, and inventory for functional accuracy and stability.
- Logged and tracked defects to resolution in coordination with the development team, ensuring stable e-commerce checkout and inventory flows.

Sparks — Dating & Travel Companion Application

- Tested 6 modules — Community, AI Trip Planner, Events, Doctor Consultation, Admin, and Flight & Hotel Booking — for functional and regression accuracy.
- Planned and conducted functional, regression, and UI test cases; reported and verified defects using Zoho in collaboration with developers to ensure quality releases.
- **Built mobile automation test flows using Maestro (YAML and JavaScript)** covering onboarding, matchmaking, and discovery screens, with automated report generation and email trigger notifications after each run.

Nispanid — Wellness & Mindfulness Application

- Tested core wellness features including playback, streak tracking, and personalized program screens for functional, UI, and regression accuracy.
- **Automated key mobile flows using Maestro (YAML and JavaScript)**, covering playback, streak tracking, and personalized program screens, with automated report generation and email trigger notifications.

Darshan Puja — Religious Services & E-Commerce Platform

- Performed manual testing for booking, e-commerce, user account, and rewards modules.
- Created and ran functional, regression, and smoke test cases covering booking workflows, transactions, account features, and reward point calculations.
- Flagged and escalated defects through Zoho for developer triage; conducted UI, responsive, and cross-browser testing.
- **Built a web automation framework using Playwright with Java, following the Page Object Model (POM)** design pattern, covering temple browsing, puja booking, and chadhava offering flows, with automated report generation and email trigger notifications.

Pharmix — Audit Management Platform

- Carried out manual testing for the Vendor Audit module, validating end-to-end audit workflows.
- Designed and executed 500+ test cases covering Vendor Audit and Revert Flow modules.
- Verified UI elements, form validations, and workflow logic through structured functional and regression cycles.
- Documented and monitored defect resolution status using Zoho.

TYI — The Yoga Institute Website

- Completed 9+ module-specific testing covering UI, functional, and regression checks.
- Validated responsive design and cross-browser compatibility; logged and confirmed defect fixes using Zoho.

Colearn Website — React to Next.js Migration

- Tested assigned modules during the platform migration from React to Next.js.

SOFTWARE TESTING TRAINING PROJECTS

Azeezia Hospital Website — Automation Testing

- Automated selected flows using Selenium, TestNG, and JMeter; identified and validated defects.

FirstCry — Manual Testing

- Prepared test cases, defect distribution reports, and module-wise test reports.

ACADEMIC PROJECT

Workers Portal — College Project

- Technologies used: Python, Django, HTML, CSS, JavaScript, Bootstrap, SQLite.
- Built a service-booking platform connecting users with local professionals; developed core modules for search, booking, and profile management.

TECHNICAL SKILLS

Manual Testing: SDLC, STLC, Test Scenario Design, Bug Life Cycle, Test Case Design & Execution, Bug Report Preparation, Agile Scrum Methodology

Automation Testing: SQL, Java, Selenium IDE, Selenium WebDriver, Maven with TestNG/JUnit, Eclipse, Playwright, Page Object Model (POM), Maestro (Mobile Automation — YAML, JavaScript)

Tools & Software: Selenium, Playwright, Java, Maestro, Android Studio, JMeter, Postman, Swagger, Jira, Zoho

EDUCATION

B.Sc. Computer Science — Nethaji Memorial Arts and Science College

Sep 2021 – March 2024

CERTIFICATIONS

- National Council for Technology & Training
- Completed Training in Software Testing — Luminar Technolab

LANGUAGES

English, Malayalam, Tamil
